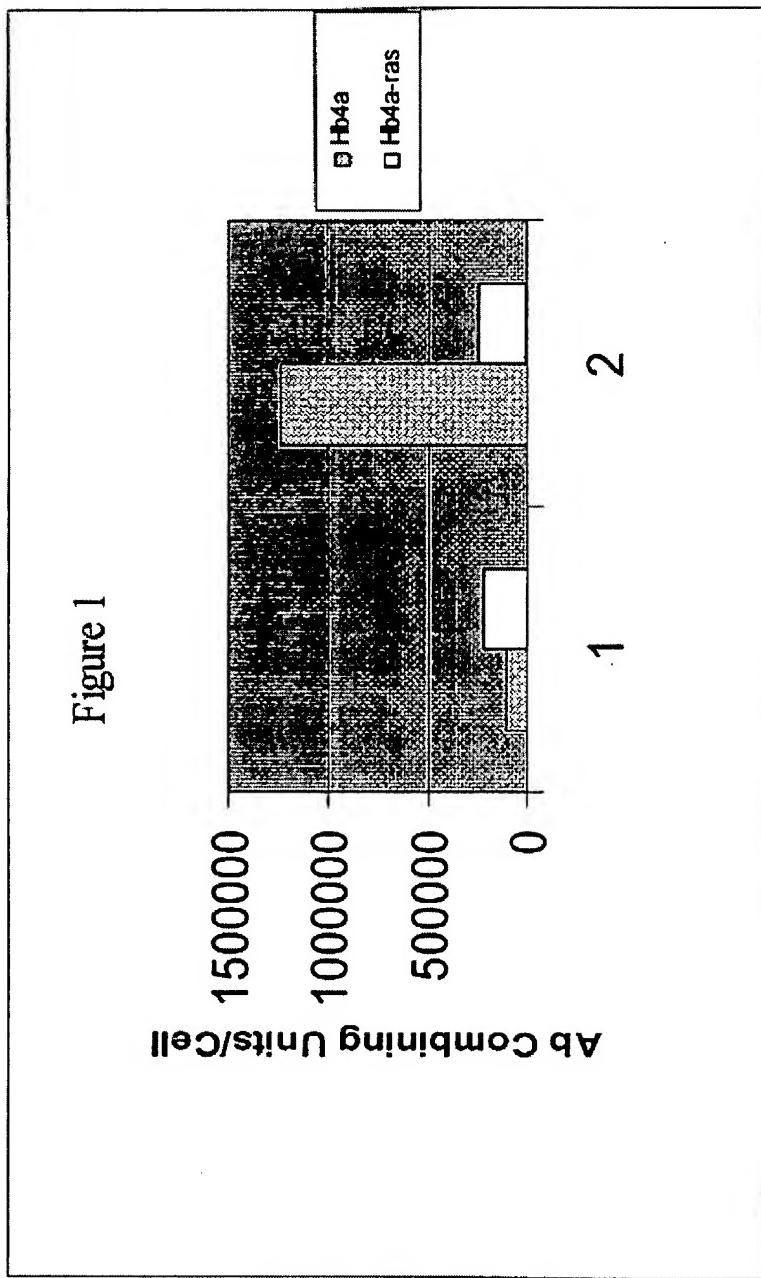

Figure 2

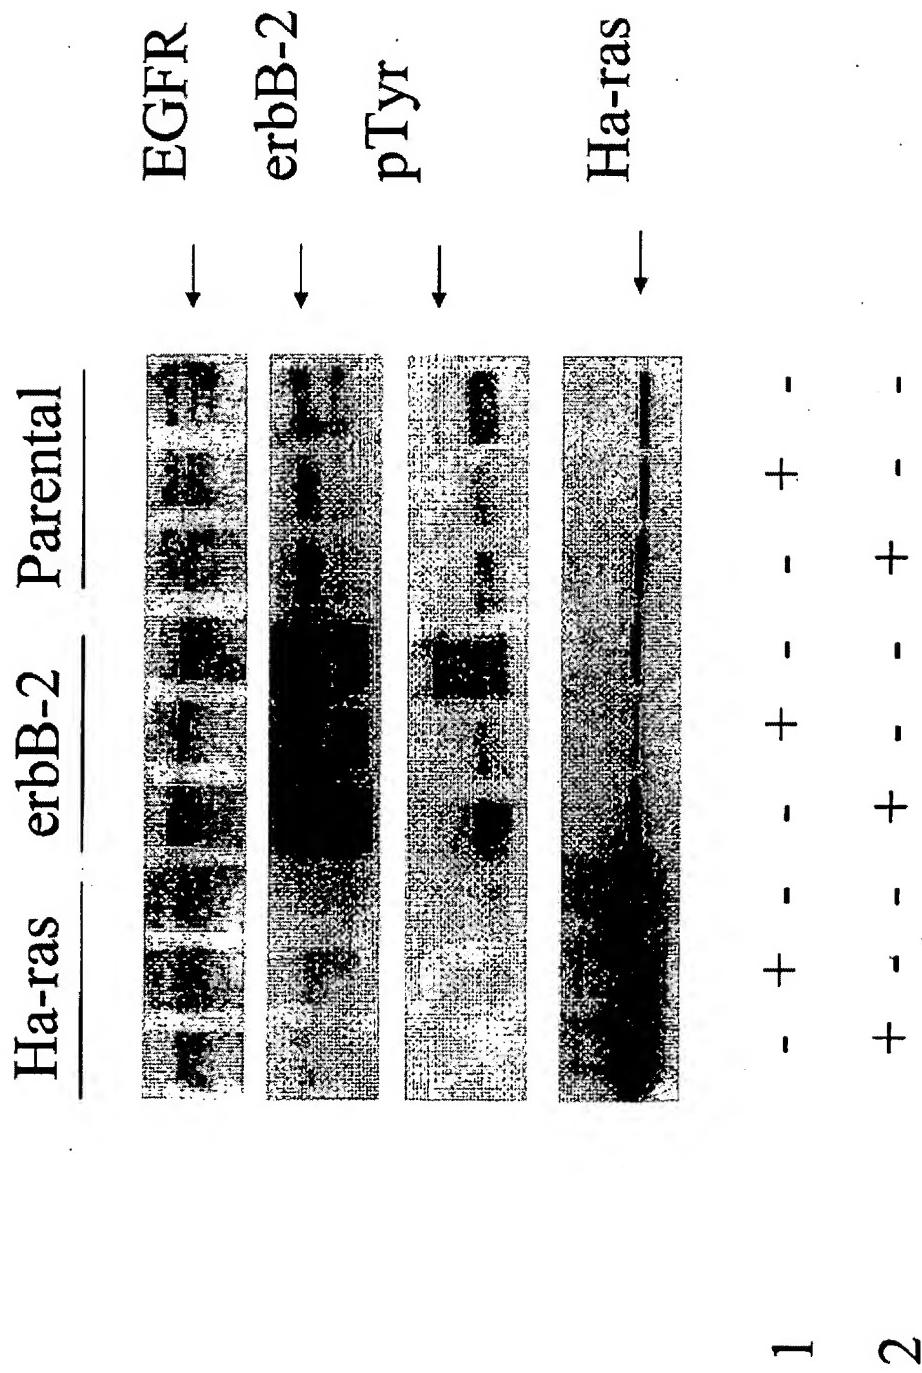

Figure 3

Parental erbB-2 Ha-ras

The figure displays two Western blots. The left blot shows Ha-ras expression, with bands visible in all lanes except the first (-). The right blot shows pErk1/Erk2 and Erk1/Erk2 expression, with bands visible in all lanes except the first (-). The lanes are grouped by cell line: HEK293T, NIH3T3, and PC3. Within each cell line group, lanes are ordered by condition: - (negative control), + (positive control), - (negative control), + (positive control), - (negative control), + (positive control), - (negative control), + (positive control).
